

School Streets

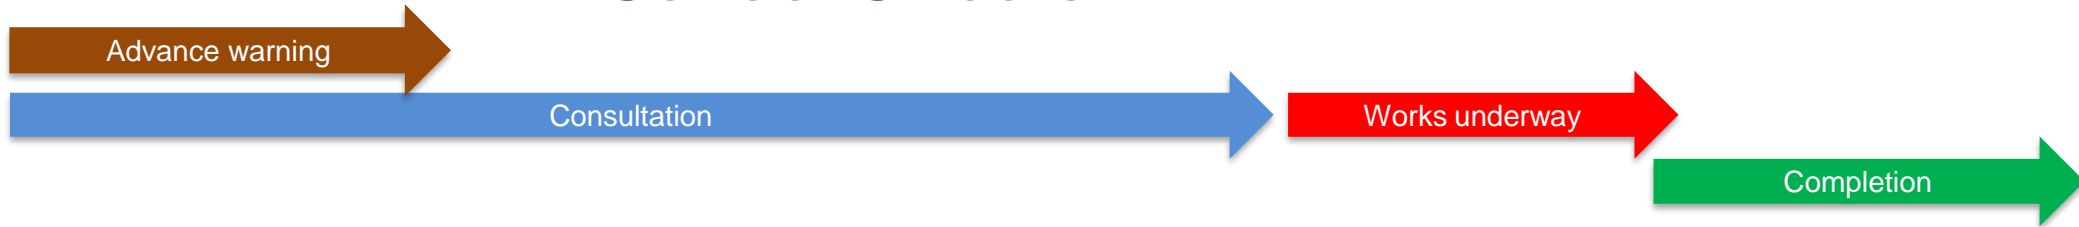

School Streets are timed closures of streets outside schools at the start and end of the school day. This provides safe spaces for children to walk, cycle and scoot by banning traffic. These are done either voluntarily or with permanent measures such as bollards or barriers. We are planning to roll this out at more schools across Southampton.

Objectives:

- To provide safe routes to schools for all at the start and end of the school day;
- Encourage more cycling, walking and scooters to school; and
- Managing social distancing.

School Streets

		Early perception resident and school opinion survey	Stakeholder engagement	Local consult events to view plans. Online Teams option	Pre scheme resident comms	Scheme start PR, social media, website, SCC transport emails	Ongoing scheme comms and engagement	Scheme completion and behaviour change
Target groups		Engagement through School Travel Plans or starting anew	Scheme info to emergency services, bus ops, RM/deliver, MP's, disability groups, ward councillors, interest groups	Scheme information and chance to feedback on final scheme designs	You said we did start of scheme comms and TRO	General scheme info outward comms including CGI	Social media and transport SCC database scheme updates	Full media campaign using internal and external channels and workplace and schools workstreams
